## DETAILED ACTION

### STATUS

Claims 1-81 are pending.

### *Election/Restrictions*

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, 46-49 are drawn to accessing storage device, classified in class 710 subclass 1.
  - II. Claims 9-20 are drawn to accessing a data wirelessly with an access key, classified in class 381 subclass 311.
  - III. Claims 21-30 wireless data, classified in class 381 subclass 1.
  - IV. Claims 31-38, 43-45 secure channel of communications, classified in class 705 subclass 64.
  - V. Claims 39-42 secure channel with authentication, classified in class 705 subclass 67.

Inventions I -V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in invention I does not require the particulars of the subcombination as claimed in inventions II -V such as an a wireless module , AAA capabilities (invention III), a protected channel of communication (invention IV) and a second key (invention V).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
